FRTek attending the MWC(Mobile World Congress)
Americas 2018 in Los Angeles

On September 12th~15th, FRTek attended the MWC(Mobile World Congress) Americas 2018 in Los Angeles, which was hosted by the GSM Association and held in the LACC(LA Convention Center).

This event had over 1,000 exhibitors and 21,000 participants, introducing their products of AI, wireless communication, IoT, VR, network, mobile devices, and more.

FRTek participated in this event by preparing 2 booths for the show, a booth in booth with KT(Korea Telecom) to show our '5G DAS', which was the world's first 5G DAS trial service at the PyeongChang 2018 Winter Olympics, and an individual booth from FRTek's US branch to show our DAS products targeted for the North America region, such as the 'SIERRA' and the 'INOVA', along with our amplifier products as well.

All visitors to both FRTek booths were VERY impressed with the fact that we had deployed the first 5G DAS at the PyeongChang 2018 Winter Olympics with KT, and also with our product line-up for the North America region!
